TARIFF FORMAT

1. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.A.
2. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in its tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect.
3. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
 - 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.a.
 - 2.1.1.A.1.a.l.
 - 2.1.1.A.1.a.l.i.
4. Check Sheets - When a Tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

SECTION 5 - SERVICE DESCRIPTIONS (Cont'd)5.4 Rate Categories

There are six rate categories that may apply to Company's Services.

5.4.1 Channel Terminations

The Channel Termination Rate Category provides for the communications path between a Customer designated premises, and another Customer designated premises. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the Company's service is to be connected, and the type of signaling capability (if any). One channel Termination charge applies per Customer designated premises at which the service is terminated.

5.4.2 Channel Mileage

The Channel Mileage Rate Category provides for the transmission facilities between two or more Customer designated premises. The Channel Mileage Rate Category is not applied to services that are less than one V&H computed mile (as described in Section 5.6 of this Tariff), unless specified. Channel Mileage is portrayed in mileage bands. There are two rates that apply for each band, i.e., a flat rate per band and a rate per mile.

5.4.3 Optional Features and Functions

The Optional Features and Functions Rate Category provides for optional services which may be added to a Company's service to improve its quality or characteristics to meet specific communications requirements. These services are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics that may be obtained. These characteristics may be derived using various combinations of equipment.

SECTION 5 - SERVICE DESCRIPTIONS (Cont'd)5.4 Rate Categories (Cont'd)5.4.4 Extraordinary Charges

From time to time, Customers may request special services not addressed specifically by rate elements in this Tariff, or services to locations that may cause Company to incur extraordinary expenses not contemplated in the provision of standard service offerings. These costs include, but are not limited to:

- Additional construction costs

- Additional equipment
- Special facilities routing

In these cases, the Customer will be billed additional charges computed on an ICB. Any Special Service Arrangements between the Customer and the Company will be provided to the ORS upon request.

5.4.5 Volume Discounts

Discounts for specified dollar volumes of traffic to a specific location or aggregate dollar volumes may apply, as specified in this Tariff, to Customers that subscribe to substantial volumes of Company's services.

5.4.6 Term Discounts

Customers will be eligible for discounts for executing agreements for services for one to seven years, as specified in this Tariff.

SECTION 5 - SERVICE DESCRIPTIONS (Cont'd)5.5 Application of Rate Elements

The rate categories described in Section 5.4 of this Tariff will be applied as follows:

- Channel Mileage (when applicable)
- Optional Features and Functions (when applicable)
- Extraordinary Charges (when applicable)
- Volume Discounts (when applicable)

- Channel Mileage (when applicable)
- Optional Features and Functions (when applicable)
- Extraordinary Charges (when applicable)

- Term Discounts (when applicable)

5.6 Regulations and Computations of Mileage

Airline mileage, used in connection with determining rates for the Channel Mileage element, is obtained by using the "V" and "H" coordinates assigned to each point as set forth in the National Exchange Carrier Association Tariff FCC No. 4. This procedure is also referenced in the AT&T Tariff FCC No. 10. To determine the airlines distance between any two locations, proceed as follows:

1. Utilize the "V" and "H" coordinates for each Customer designated location.
2. Obtain the difference between the "V" coordinates of each of the locations. Obtain the difference between the "H" coordinates.
3. Square each difference obtained in step 5.6.2 above.
4. Add the square of the "V" difference and the "H" difference obtained in step 3 above.
5. Divide the sum of the square by 10. Round to the next higher whole number if any fraction is obtained.

SECTION 5 - SERVICE DESCRIPTIONS (Cont'd)5.7 Contract Rates - Special Pricing Arrangements - ICB

5.7.1 In lieu of the rates, terms, and conditions set forth in this Tariff, rates and charges, including minimum usage, installation, special construction and recurring charges for Company's services may be established at negotiated rates on an ICB, taking into account the nature of the facilities and services, the costs of construction and operation, the volume of traffic, the length of service commitment by the Customer, and use of facilities by other Customers. Such arrangements shall be considered Special Pricing Arrangements, the terms of which will be set forth in individual Customer contracts. Special Pricing Arrangements need not be filed with the Commission, but are made available to the ORS upon request. Unless otherwise specified in the individual Customer contract, the terms, conditions, obligations, and regulations set forth in this Tariff shall be incorporated into, and become a part of, said contract, and shall be binding on Company and Customer. In the event of a conflict between the terms and conditions of this Tariff and an individual Customer contract, the terms and conditions from the individual Customer contract shall apply. Specialized rates or charges will be made available to similarly situated customers on a non-discriminatory basis.

5.7.2 In addition to any rate or charge established by the Company, the Customer will also be responsible for any recurring or non-recurring charges imposed by local exchange telephone companies incurred by or on behalf of the Customer in establishing and maintaining service. Such charges may be billed by the Company or directly by the local exchange company, at the Company's option.

In addition to all recurring, non-recurring, usage or special charges, Customer shall also be responsible for and shall pay all applicable federal, state and local sales, use and excise taxes. All such taxes will appear as separate line items on the Customer's bill.
